Total Tonnes	984.5		984.6	
Total Tonnes Diverted	365.9	37.2%	454.71	46.2%

¹ Organics projected is based on the average kg per hh per year (as found in the pilot project) and applying that figure to the total number of hh in the community.

Orangeville - 8400 HH

Shelburne - 1550 HH

Grand Valley - 968 HH

*note: the garbage figure for GV is estimated, as only the village settlement receives garbage collection. This number is estimated to include the entire municipality. 358 tonnes of garbage were collected in 2000, from 560 HH in the Village of Grand Valley
